PUBLICATIONS ISSUED BY THE PROTEIN AND NUTRITION DIVISION
BUREAU OF CHEMISTRY AND SOILS
UNITED STATES DEPARTMENT OF AGRICULTURE

1916

1. Kafirin, an Alcohol Soluble Protein from Kafir, Andropogon sorghum. By Carl O. Johns and J. F. Brewster. J. Biol. Chem., 1916, xxviii, No. 1, 59-65.

2. Some proteins from the Jack Bean, Canavalia ensiformis. By D. Breese Jones and Carl O. Johns, J. Biol. Chem., 1916, xxviii, No. 1, 67-75.

3. The Proteins of the Peanut, Arachis hypogea. I. The Globulins Arachin and Conarachin. By Carl O. Johns and D. Breese Jones. J. Biol. Chem., 1916, xxviii, No. 1, 77-87.

4. The Proteins of the Peanut, Arachis hypogea. II. The Distribution of the Basic Nitrogen in the Globulins Arachin and Conarachin. By Carl O. Johns and D. Breese Jones. J. Biol. Chem., 1917, xxx, No. 1, 33-38.

5. A Saponin from Yucca filamentosa. By L. H. Chernoff, Arno Viehoever and Carl O. Johns. J. Biol. Chem., 1917, xxviii, No. 2, 437-443.

6. The Proteins of the Peanut, Arachis hypogea. By Carl O. Johns and D. Breese Jones. Nat. Acad. Sci., 1917, No. 3, 365-369.

7. Chemistry of the Cotton Plant, with Special Reference to Upland Cotton. By Arno Viehoever, Lewis H. Chernoff, and Carl O. Johns. J. Agr. Res., 1918, xiii, No. 7, 345-352.

8. Stizolobin, the Globulin of the Chinese Velvet Bean, Stizolobium niveum. By Carl O. Johns and A. J. Finks. J. Biol. Chem., 1918, xxxiv, No. 2, 429-438.

9. The Globulin of Buckwheat, Fagopyrum fagopyrum. By Carl O. Johns and Lewis H. Chernoff. J. Biol. Chem., 1918, xxxiv, No. 2, 439-445.

10. The Determination of Tyrosine in Proteins. By Carl O. Johns and D. Breese Jones. J. Biol. Chem., 1918, xxxvi, No. 2, 319-322.

11. The Hydrolysis of kafirin. By D. Breese Jones and Carl O. Johns. J. Biol. Chem., 1918, xxxvi, No. 2, 323-334.

12. The Proteins of the Peanut, Arachis Hypogea. III. The Hydrolysis of Arachin; by Carl O. Johns and D. Breese Jones; J. Biol. Chem., 1918, xxxvi, No. 3, 491 - 500.

13. Globulin of the Coconut, Cocos Nucifera. I. Preparation of Coconut Globulin. Distribution of the Basic Nitrogen in Coconut Globulin; by Carl O. Johns, A. J. Finks and C. E. F. Gersdorff; J. Biol. Chem., 1919, xxxvii, No. 1, 149 - 153.

14. Studies in Nutrition. I. The Nutritive Value of Coconut Globulin and Coconut Press Cake; by Carl O Johns, A. J. Finks and Mabel S. Paul; J. Biol. Chem., 1919, xxxvii, No. 4, 497 - 502.

15. The Proteins of the Peanut; by Carl O. Johns; The Cotton Press, April, 1919, 41 - 42; Am. Food J., April, 1919.

16. Lysine as a Hydrolytic Product of Hordein; by Carl O. Johns and A. J. Finks; J. Biol. Chem., 1919, xxxviii, No. 1, 63 - 66.

17. The Hydrolysis of Stizolobin, the Globulin of the Chinese Velvet Bean, Stizolobium Niveum; by D. Breese Jones and Carl O. Johns; J. Biol. Chem., 1919, xl, No. 2, 435 - 448.

18. Distribution of the Basic Nitrogen in Phaseolin; by A. J. Finks and Carl O. Johns; J. Biol. Chem., 1920, xli, 375 - 377.

19. Studies in Nutrition. II. The Role of Cystine in Nutrition as Exemplified by Nutrition Experiments with the Proteins of the Navy Bean, Phaseolus Vulgaris; by Carl O. Johns and A. J. Finks; J. Biol. Chem., 1920, xli, No. 3, 379 - 389.

20. Studies in Nutrition. III. The Nutritive Value of Commercial Corn Gluten Meal; by Carl O. Johns, A. J. Finks and Mabel S. Paul; J. Biol. Chem., Vol. xli, No. 3, March, 1920, 391 - 399.

21. Some Proteins from the Georgia Velvet Bean, Stizolobium Deeringianum; by Carl O. Johns and Henry C. Waterman; J. Biol. Chem., 1920, xlii, No. 1, 59 - 69.

22. Studies in Nutrition. IV. The Nutritive Value of Peanut Flour as a Supplement to Wheat Flour; by Carl O. Johns and A. J. Finks; J. Biol. Chem., 1920, xlii, No. 3, 569 - 579.

23. Some Amino Acids from the Globulin of the Coconut as Determined by the Butyl Alcohol Extraction Method of Dakin; by Carl O. Johns and D. Breese Jones; J. Biol. Chem., 1920, xliv, No. 2, 383 - 390.

24. Hydrolysis of the Globulin of the Coconut, Cocos Nucifera; by D. Breese Jones and Carl O. Johns; J. Biol. Chem., 1920, xliv, No. 2, 291 - 301.

25. Some Proteins from the Mung Bean, Phaseolus Aureus Roxburgh; by Carl O. Johns and Henry C. Waterman; J. Biol. Chem., 1920, xliv, No. 2, 303 - 317.

26. The Globulin of the Cohune Nut, Attalea Cohune; by Carl O. Johns and C. E. F. Gersdorff; J. Biol. Chem., 1920, xlv, No. 1, 57 - 67.

27. Studies in Nutrition. V. The Nutritive Value of Soy Bean Flour as a Supplement to Wheat Flour; by Carl O. Johns and A. J. Finks; Am. J. Physiol., 1921, lv, No. 3, 455 - 461.

28. Studies in Nutrition. VI. The Nutritive Value of the Proteins of the Lima Bean, Phaseolus Lunatus; by A. J. Finks and Carl O. Johns; Am. J. Physiol., lvi, No. 1, 1921, 205-207.

29. Studies in Nutrition. VII. The Nutritive Value of the Proteins of the Adsuki Bean, Phaseolus Angularis; by Carl O. Johns and A. J. Finks; Am. J. Physiol., lvi, No. 1, 1921, 208 - 211.

30. The Basic Amino Acids of Glycinin, the Globulin of the Soy Bean, Soja Hispida, as Determined by Van Slyke's Method; by D. Breese Jones and Henry C. Waterman; J. Biol. Chem., Vol. xlvi, No. 3, 1921, 459 - 462.

31. Studies in Nutrition. VIII. The Nutritive Value of the Proteins of Tomato Seed Press Cake; by A. J. Finks and Carl O. Johns; Am. J. Physiol., lvi, No. 3, 1921, 404 - 407.

32. Studies on the Digestibility of Proteins in Vitro. II. The Relative Digestibility of Various Preparations of the Proteins from the Chinese and Georgia Velvet Beans; by Henry C. Waterman and D. Breese Jones; J. Biol. Chem., 1921, xlvii, 285 - 295.

33. Studies in Nutrition. IX. The Nutritive Value of the Proteins from the Chinese and Georgia Velvet Beans; by A. J. Finks and Carl O. Johns; Am. J. Physiol., lvii, No. 1 , 1921, 61 - 67.

34. Determination of the Mono-Amino Acids in the Hydrolytic Cleavage Products of Lactalbumin; by D. Breese Jones and Carl O. Johns; J. Biol. Chem., 1921, xlviii, 347 - 360.

35. Studies on the Digestibility of Proteins. I. The Effect of Cooking on the Digestibility of Phaseolin; by Henry C. Waterman and Carl O. Johns; J. Biol. Chem., 1921, xlvi, No. 1, 9 - 17.

36. The Proteins of the Tomato Seed, Solanum Esculentum; by Carl O. Johns and C. E. F. Gersdorff; J. Biol. Chem., 1922, li, 439 - 452.

37. The Role of Cystine in the Dietary Properties of the Proteins of the Cow Pea, Vigna Sinensis, and of the Field Pea, Pisum Sativum; by A. J. Finks, D. Breese Jones and Carl O. Johns; J. Biol. Chem., lii, 403, 1922.

38. Proteins of the Lima Bean, Phaseolus Lunatus; by D. Breese Jones, C. E. F. Gersdorff, C. O. Johns and A. J. Finks; J. Biol. Chem., liii, 1922, 231.

39. A Note on the Nutritional Adequacy of the Proteins of the Chinese and Georgia Velvet Beans with Reference to Amino Acid Composition; by D. Breese Jones, A. J. Finks and H. C. Waterman; J. Biol. Chem., 1922, lii, 209.

40. The Peanut --- An Excellent Food but not a Magic Hair Restorer; by D. Breese Jones; The Peanut Promoter, 1922, V, No. 3, 50.

41. Studies on the Digestibility of Proteins in Vitro. III. On the Chemical Nature of the Nutritional Deficiencies of Arachin; by D. Breese Jones and Henry C. Waterman; J. Biol. Chem., lii, 357, 1922.

42. A Chemical Study of the Proteins of the Adsuki Bean, Phaseolus Angularis; by D. Breese Jones, A. J. Finks and C. E. F. Gersdorff; J. Biol. Chem., 1922, li, 103 - 114.

43. Chronic Intoxication by Small Quantities of Cadmium Chlorid in the Diet; by Carl O. Johns, A. J. Finks and Carl L. Alsberg; J. Pharmacology and Experimental Therapeutics, xxi, 1923, No. 1, p. 59.

44. Conphaseolin. A New Globulin from the Navy Bean, Phaseolus Vulgaris; by Henry C. Waterman, Carl O. Johns, and D. Breese Jones, with the assistance of S. Phillips; J. Biol. Chem., 1923, lv, No. 2, 93.

45. The Preparation of Tryptophane from the Products of Hydrolysis of Lactalbumin with Baryta; by Henry C. Waterman; J. Biol. Chem., 1923, lvi, No. 1, 75.

46. Proteins of the Cantaloupe Seed, Cucumis Melo. Isolation of a Crystalline Globulin, and a Comparative Study of this Globulin with the Crystalline Globulin of the Squash Seed, Cucurbita Maxima; by D. Breese Jones and C. E. F. Gersdorff; J. Biol. Chem., 1923, lvi, No. 1, 79.

47. Studies on the Digestibility of Proteins in Vitro. IV. On the Digestibility of the Cottonseed Globulin and the Effect of Gossypol upon the Peptic-Tryptic Digestion of Proteins; by D. Breese Jones and Henry C. Waterman; J. Biol. Chem., 1923, lvi, No. 2, 501.

48. Nutritive Value of Mixtures of Proteins from Corn and Various Concentrates; by D. Breese Jones, A. J. Finks and Carl O. Johns; J. Ag. Research, xxiv, 1923, No. 11, 971.

49. Growth-Promoting Value of the Proteins of the Palm Kernel, and the Vitamin Content of Palm Kernel Meal; by A. J. Finks and D. Breese Jones; J. Ag. Research, 1923, xxv, No. 4, 165.

50. Making a Nutritionally Balanced Bread; by C. O. Johns, A. J. Finks and D. Breese Jones; Am. Food J., xviii, No. 8, 1923, 304 - 306.

51. The Quality of Proteins in Nutrition; by D. Breese Jones; Flour and Feed, 1923, xxiv, December, p. 12.

52. Proteins of Wheat Bran. I. Isolation and Elementary Analyses of a Globulin, Albumin and Prolamin; by D. Breese Jones and C. E. F. Gersdorff; J. Biol. Chem., 1923, lviii, No. 1, 117.

53. Cystine Deficiency and Vitamin Content of the Lentil, Lens Esculenta Moench; by D. Breese Jones and Joseph C. Murphy, with the assistance of Otto Moeller; J. Biol. Chem., 1924, lix, No. 2, 243.

54. Tryptophane and Cystine Content of Various Proteins; by D. Breese Jones, C. E. F. Gersdorff and O. Moeller; J. Biol. Chem., (1924), Vol. lxii, No. 1, p. 183.

55. The Effect of Long Continued Storage at Low Temperatures on the Vitamin-A Content of Eggs; by D. Breese Jones, Joseph C. Murphy and Otto Moeller; Am. J. Physiol., (1925), Vol. lxxi, No. 2, p. 265.

56. Vitamin-A Content of Fresh Eggs; by Joseph C. Murphy and D. Breese Jones; J. Ag. Res., 1925, Vol. 29, No. 5.

57. Proteins of the Cotton Seed; D. Breese Jones and Frank A. Csonka; Proc. Soc. Exp. Biol. & Med., 1925, xxii, pp. 226-227; J. Biol. Chem., Vol. lxiv, 1925, 673.

58. Proteins of Wheat Bran; II. Distribution of Nitrogen, Percentages of Amino Acids and of Free Amino Nitrogen. A Comparison of the Bran Proteins with the Corresponding Proteins of Wheat Endosperm and Embryo; D. Breese Jones and C. E. F. Gersdorff; J. Biol. Chem., lxiv, p. 241, (1925).

59. Proteins of the Bark of the Common Locust Tree, Robinia pseudacacia. 1. Enzymes associated with the proteins: The composition, properties, nitrogen distribution, and some of the amino acids of the albumin; D. Breese Jones, C. E. F. Gersdorff and O. Moeller; J. Biol. Chem., lxiv, 655 (1925).

60. The Nitrogen Distribution and Percentages of Some Amino Acids in the Muscle of the Shrimp, Peneus setiferus (L.); by D. Breese Jones, O. Moeller, and C. E. F. Gersdorff; J. Biol. Chem., lxv, No. 1, p. 59.

61. Proteins of Timothy and Orchard Grass Pollen and Their Relation to Vernal Hay Fever; F. A. Csonka, H. S. Bernton, and D. B. Jones; Proc. Soc. Exp. Biol. and Med., 1925, xxiii, pp. 14-16.

62. The Chemistry of Proteins and its Relation to Nutrition; D. Breese Jones; Am. J. Pub. Health, Vol. XV, No. 11, Nov. 1925.

63. The Iso-electric Points of Various Proteins; Frank A. Csonka, Joseph C. Murphy and D. Breese Jones; J. Am. Chem. Soc., 48, 763 (1926).

64. A New Factor for Converting the Percentage of Nitrogen in Wheat into that of Protein; D. Breese Jones; Cereal Chemistry, Vol. III, No. 3, pp. 194-198, (1926).

65. Proteins of Wheat Bran. III. The Nutritive Properties of the Proteins of Wheat Bran; Joseph C. Murphy and D. Breese Jones; J. Biol. Chem., 1926, Vol. lxix, No. 1, p. 85.

7 - Publications

66. The Nutritional value of oysters and other sea food. By D.Breese Jones, Am. J. Pub. Health Assn., 1926, xvi, No. 12, 1177.

67. A Method for the study of the formation of volatile sulfur compounds by bacteria. By L. H. Almy and L. H. James. J. Bact., 1926, xii, No.5, 319.

68. The Role of the proteolytic enzymes in the decomposition of the herring. By L. H. Almy, J. Am. Chem Soc., 1926, xlviii, 2136.

69. Immunologic reactions of the globulins from the seeds of leguminous plants. The Biologic reactions of the vegetable proteins. ix. By H. G. Wells, J. H. Lewis and D. B. Jones, J. Infect. Dis., 1927, xl, 326.

70. Studies on glutelins. I. The A- and B-glutelins of wheat (Triticum vulgare). By F. A. Csonka and D. B. Jones. J. Biol. Chem., 1927, lxxiii, 321.

71. Proteins in feedstuffs very much. By D. Breese Jones. Yearbook of Agriculture, 1926, 612-617.

72. Pollen proteins and their clinical significance in hay fever. By. H. S. Bernton, D. Breese Jones and F. A. Csonka. Southern Med. J., 1927, xx , 257.

73. The Globulins of rice, Oryza sativa. By D. Breese Jones and Charles E. F. Gersdorff. J. Biol. Chem., 1927, lxxiv, p. 415.

74. Studies on glutelins. II. The glutelin of rice (Oryza sativa). By D. Breese Jones and Frank A. Csonka. J. Biol. Chem., 1927, lxxiv, 427.

75. Decomposition of free and combined cystine with special reference to certain effects produced by heating fish flesh. By L. H. Almy. J. Am. Chem. Soc., 1927, xlix, 2540.

76. Proteins of sesame seed, Sesamun indicum. By D. Breese Jones and C. E. F. Gersdorff. J. Biol. Chem., 1927, lxxv, 213.

77. Studies on glutelins. III. The Glutelin of oats (Avena sativa). By Frank A. Csonka. J. Biol. Chem., 1927, lxxv, 213.

8-Publications

78. Biological Values of Certain Types of Sea Food. II. Vitamins in Oysters (Ostrea virginica). By D. Breese Jones, J. C. Murphy, and E. M. Nelson. Ind. and Eng. Chem., 1928, xx, No. 2, 205.

79. Quality and Quantity of Constituents of Foods Measured to Determine Nutritional Values. Topic 30.--Chemical Research. By D. Breese Jones. United States Daily, Wednesday, April 18, 1928. Washington, D. C.

80. Feeding Experiments are Made to Determine Nutritional Value of Proteins in Foodstuffs. Topic 30.--Chemical Research. By D. Breese Jones. United States Daily, Thursday, April 19, 1928. Washington, D. C.

81. Biological Values of Certain Types of Sea Food. III. Vitamins in Clams. By D. Breese Jones, E. M. Nelson, and J. C. Murphy. Ind. and Eng. Chem., 1928, xx, 648.

82. Oysters are High in Food Value; Vitamin Content Exceptional. By D. Breese Jones. Year Book of Agriculture, U. S. Dept. of Agriculture, 1927, p. 491.

83. Peanuts a Valuable Food for Man and Feed for Livestock. By D. Breese Jones. Year Book of Agriculture, U. S. Dept. of Agriculture, 1927, p. 503.

84. Food Values. By D. Breese Jones. Congressional Cook Book, 1927.

85. Studies on Glutelins. IV. The Glutelins of Corn (Zea Mays). By D. Breese Jones and Frank A. Csonka. J. Biol. Chem., 1928, lxxviii, 289.

86. Regulating the Storage of Vitamin A in Animals to be Used for the Determination of this Vitamin. By E. M. Nelson. Science, 1928, lxviii, No. 1757, 212.

87. Some Recent Determinations of Aspartic and Glutamic Acids in Various Proteins. By D. Breese Jones and Otto Moeller. J. Biol. Chem., 1928, lxxix, 429.

88. Observations Bearing on the Determination of Vitamin A. By E. M. Nelson and D. Breese Jones. J. Biol. Chem., 1928, lxxx, 215.

89. The Dicarboxylic Amino Acid Fraction in Gliadin. By D. Breese Jones and Russell Wilson. Cereal Chem., 1928, v, 473.

90. Cod Liver Oil in Feeds. By E. M. Nelson. Flour and Feed, 1928, xxix, No. 7, 32.

9-Publications

91. The Demethoxylation of Lignin in the Animal Body. By Max Phillips, Herman Weihe, D. B. Jones, and F. A. Csonka. Proc. Soc. Exp. Biol. and Med., 1929, xxvi, 320.

92. Proteins of the Avocado (Persea Americana Mill). By D. Breese Jones and Charles E. F. Gersdorff. J. Biol. Chem., 1929, lxxxi, 533.

93. Lignin as a Factor in the Formation of Hippuric Acid. By F. A. Csonka, M. Phillips, and D. B. Jones. Proc. Am. Soc. Biol. Chemists, 1928, vii, No. 3, 24.

94. Studies on Glutelins. V. The Glutelins of Rye (Secale cereale), and of Barley (Hordeum vulgare). By F. A. Csonka and D. Breese Jones. J. Biol. Chem., 1929, lxxxii, 17.

95. Cod Liver Oil and Its Role in Human Nutrition. By E. M. Nelson, Proceedings Third Race Betterment Conference, 1928, p. 442.

96. Cod Liver Oil in Feeds Requires Care to Preserve Vitamin. Yearbook of Agriculture, U. S. Department of Agriculture, 1928, p. 204.

97. Studies on Lignin Metabolism. By F. A. Csonka, M. Phillips, and D. Breese Jones. J. Biol. Chem., 1929, lxxxv, 65.

98. The Nutritive Value of Mayonnaise. By E. M. Nelson. The Spice Mill, Nov., 1929, lii, No. 11, 2076; also in Oil & Fat Industries, 1930, vii, No. 1, 13.

99. Nutritional Value of Foodstuffs Determined by Federal Tests. By D. Breese Jones. United States Daily, January 18, 1930.

100. Effects of Proteins on Animals Determined to Evaluate Feeds. By D. Breese Jones. United States Daily, January 20, 1930.

101. Sweet Potatoes High in Food Value and Vitamin Content. By D. Breese Jones. Yearbook of Agriculture, U. S. Department of Agriculture, 1929.

102. Studies on the Biochemistry of Sulfur. VI. The Cystine Content of Conphaseolin and Phaseolin. By M. X. Sullivan and D. Breese Jones. Supplement No. 82 to U. S. Public Health Reports, 1930.

103. The Vitamin Content of Ethylene-Treated and Untreated Tomatoes at Various Stages of Development. By D. Breese Jones and E. M. Nelson. Amer. J. Pub. Health, 1930, xx, No. 4, 387.

104. The Proportions of Arachin and Conarachin and the Proportionate Occurrence of These Proteins in the Peanut. By D. Breese Jones and Millard J. Horn. J. Agr. Res., 1930, xl, No. 7, 673.

10-Publications

105. Nutritional Studies on Cottonseed Meal. By Henry Stevens. Oil & Fat Industries, 1930, vii, No. 6, 215.

106. The Prolamins of Dwarf Yellow Milo and Feterita, Two Horticultural Varieties of Holcus Sorghum. By D. Breese Jones and Frank A. Csonka. J. Biol. Chem., 1930, 88, 305.

107. Studies on Glutelins. VI. The Optical Rotation of the Glutelins of Wheat, Rye, Barley, Maize, and Rice. By Frank A. Csonka, Millard J. Horn, and D. Breese Jones. J. Biol. Chem., 1930, 89, 267.

108. Vitamins A and D in Fish Oils. By E. M. Nelson and J. R. Manning. Ind. & Eng. Chem., 1930, xxii, No. 12, 1361.

109. Vitamins in Sugarcane Juice and in Some Cane-Juice Products. By E. M. Nelson and D. Breese Jones. J. Agr. Res., 1930, xli, No. 10, 749.

110. Vitamin D in Menhaden Fish Oils. By J. R. Manning, E. M. Nelson and C. D. Tolle. U. S. Dept. of Commerce, Bureau of Fisheries Investigational Report No. 3, Vol. 1, 1931.

111. Cereals and Their Products. The Protein Value of Cereals. By F. C. Blanck, E. V. McCollum and D. Breese Jones. Am. Pub. Health Assn. Yearbook, 1930-1931, p. 207.

112. Nutritional Problems: A New Light on the Significance of Protective Foods. By H. C. Sherman, C. A. Winslow, E. L. Fisk and E. M. Nelson. (Report of the Committee on Nutrition Problems, Am. Pub. Health Assn.) Am. Pub. Health Assn. Yearbook, 1930-1931.

113. Nutritive Value of Potato Protein and of Gelatin. By D. Breese Jones and E. M. Nelson. J. Biol. Chem., 1931, xci, No. 2, 705.

114. Ethylene-Ripened Tomatoes Not Equal in Vitamins to Naturally Ripened Fruit. By E. M. Nelson. Yearbook of Agriculture, U. S. Department of Agriculture, 1931, p. 215.

115. Oranges Impaired in Vitamin C Content by Arsenical Spray. By E. M. Nelson. Yearbook of Agriculture, U. S. Department of Agriculture, 1931, p. 416.

116. Salmon Oil and Canned Salmon as Sources of Vitamins A and D. By C. D. Tolle and E. M. Nelson. Ind. & Eng. Chem., 1931, xxiii, No. 9, p. 1066.

117. Ipomoein, a Globulin from Sweet Potatoes, Ipomoea batatas. Isolation of a Secondary Protein Derived from Ipomoein by Enzymic Action. By D. Breese Jones and Chas. E. F. Gersdorff. J. Biol. Chem., 1931, xcii, 119-126.

118. Factors for Converting Percentages of Nitrogen in Foods and Feeds into Percentages of Proteins. U. S. Department of Agriculture Bulletin No. 183, August, 1931. By D. Breese Jones.

119. Studies on the Effect of Alkali on Protein. I. The Optical Behavior of "Racemic Protein." By Frank A. Csonka and Millard J. Horn. J. Biol. Chem., 1931 (Oct.), xciii, No. 2, p. 677.

120. The Food Value of Oranges and Grapefruit. By D. Breese Jones. The Citrus Industry, 1931 (Nov.), 12, No. 11, p. 8.

121. Vitamin Content of Medicinal Cod Liver Oils and Related Products. By E. M. Nelson and Reed Walker. J. Amer. Med. Assn., 1932, xcviii, No. 15, p. 1263.

122. Photographic Records of Vitamin D Line Tests. By Henry Stevens and E. M. Nelson. Ind. & Eng. Chem., Analytical Edition, 1932, iv, No. 2, p. 200.

123. The Effect of Lead Arsenate Spray on the Composition and Vitamin Content of Oranges. By E. M. Nelson and H. H. Mottern. Amer. J. Pub. Health, 1932, xxii, No. 6, p. 587.

124. Chemical and Physical Properties of Burbot-Liver Oil and Its Vitamin Content. By E. M. Nelson, Chester D. Tolle, and George S. Jamieson. Bureau of Fisheries Investigational Report No. 12, Vol. 1, 1932.

125. Precipitation of Soy Bean Proteins at Various Concentrations of Ammonium Sulfate. By D. Breese Jones and Frank A. Csonka. J. Biol. Chem., 1932, 97, No. 1, p. xxix, in Scientific Proceedings of the Soc. Biol. Chemists, Philadelphia, Pa. April 28-30, 1932.

126. Studies on Glutelins. VII. Cystine, Tryptophane and Tyrosine Content of Glutelins. By Frank A. Csonka. J. Biol. Chem., 1932, xcvii, No. 1, p. 281.

127. The Value of Salmon Oil in the Treatment of Infantile Rickets. By Martha M. Eliot, E. M. Nelson, Susan P. Souther, and M. Katharine Cary. J. Amer. Med. Assn., 1932 (Sept.), 99, No. 13, p. 1075.

128. The Preparation of Optically Active Thiohydantoins and the Racemization of Amino Acids as Their Azlactones. By Frank A. Csonka and Ben H. Nicolet. J. Biol. Chem., 1932, 99, No. 1, p. 213.

129. Fresh and Dried Yeast as Sources of Vitamin B. By Reed Walker and E. M. Nelson. Amer. J. Physiol., 1933 (Jan.), 103, No. 1, p. 25.

130. Vitamin C Content of Frozen Orange Juice. By E. M. Nelson and H. H. Mottern. Ind. & Eng. Chem., 1933 (Feb.), 25, No. 2, p. 216.

131. Differences in the Amino Acid Content of the Chief Protein (Glycinin) from Seeds of Several Varieties of Soybean. By Frank A. Csonka and D. Breese Jones. J. Agr. Res., 1933 (Jan.), 46, No. 1, p. 51.

132. The Reducing Value of Plant Juices Containing Vitamin C as Determined by 2,6-Dichlorophenol Indophenol. By H. H. Mottern, E. M. Nelson and Reed Walker. J. A.O.A.C., Nov. 1932, p. 614-616.

133. Selenium as an Insecticide. By E. M. Nelson, A. M. Hurd-Karrer and W. O. Robinson. Science, Vol. 78, No. 2015, Aug. 11, 1933, p. 124.

134. Studies on Digestibility of Proteins in Vitro. V. Rate of Liberation of Cystine on Hydrolysis of Casein. Some Observations on Colorimetric Tests for Cystine when Applied to Peptic and Acid Digests of Casein. By D. Breese Jones and Chas. E. F. Gersdorff. J. Biol. Chem., 1933 (Aug.), 101, No. 3, p. 657-667.

135. The Relative Nutritive Value of Land and Water Products. By D. Breese Jones. Scientific Monthly, 1933 (Sept.), Vol. xxxvii, No. 3, p. 221-228.

136. Qualitative Method for Selenium in Organic Compounds. By M. J. Horn. Ind. & Eng. Chem., Analytical Edition, 1934 (Jan.), 6, No. 1, p. 34-35.

137. The Effect of Dilute Alkali on the Cystine Content of Casein. By D. Breese Jones and Chas. E. F. Gersdorff. J. Biol. Chem., 1934 (Jan.), 104, No. 1, p. 99-106.

138. The Vitamin Content of Cereals. By F. C. Blanch, E. V. McCollum, H. E. Barnard and D. Breese Jones. Report of the Committee on Cereals and their Products, Am. Pub. Health Assn. Am. Pub. Health Assn. Year Book 1932-33, Vol. xxiii, No. 6, June, 1933, p. 54.

139. Vitamin C. By H. C. Sherman, C.E.A. Winslow, E. V. McCollum, E. M. Nelson and J. A. Tobey, Report of the Committee on Nutritional Problems, Am. Pub. Health Assn. Am. Pub. Health Assn. Year Book 1932-33, Vol. xxiii, No. 6, June, 1933, p. 97.

140. The Problem of the Addition of Vitamin D to Foods for General Use. By H. C. Sherman, E. V. McCollum, E. M. Nelson, B. Wait and F. L. Gunderson. Report of the Committee on Nutritional Problems, Am. Pub. Health Assn. Am. Public Health Assn. Year Book 1933-34, Vol. xxiv, No. 2, Feb. 1934, p. 78.

141. The Effect of Dry Heat and Dilute Alkali on the Lysine Content of Casein. By R. J. Block, D. Breese Jones and Chas. E. F. Gersdorff. J. Biol. Chem., 1934, cv, 667 (July).

142. Soybeans Content of Amino Acids Varies Greatly with Variety. By D. Breese Jones and F. A. Csonka, Yearbook of Agriculture, U. S. Department of Agriculture, 1934, p. 330.

143. Vitamin Standards of International Conference Being Adopted in United States. By E. M. Nelson. Yearbook of Agriculture, U. S. Department of Agriculture, 1934, p. 366.

144. The Cystine, Tryptophane and Tyrosine Content of the Soybean. By Frank A. Csonka and D. Breese Jones. J. Agr. Res., 1934 (Aug.), 49, No.3, p. 279-282.

145. Studies on Digestibility of Proteins in Vitro. VI. Some Partial Cleavage Products from Peptic Digests of Casein. By D. Breese Jones and Chas. E. F. Gersdorff. J. Biol. Chem., 1934 (Sept.), cvi, p. 707.

146. Assay Technic for Vitamin D Milk. By E. M. Nelson. Proc. 27th Annual Convention, International Association of Milk Dealers, 1934.

147. Human Requirements for Vitamins. Report of Committee on Nutritional Problems, American Public Health Association Yearbook, 1934-1935. Suppl. to American Journal of Public Health, 1935 (Feb.), 25, No. 2,

148. Proteins of Yeast (Saccharomyces cerevisiae). By F. A. Csonka. J. Biol. Chem., 1935 (May), cix, p. 703.

149. Cottonseed Allergy and Gin. By H. Stevens. J. of Allergy, 1935, 6, No. 4, p. 393.

150. International Vitamin Standards. By E. M. Nelson. J. A.O.A.C., 1935, xviii, No. 4, p. 610.

151. Studies on Toxic Wheat Grown on Soils Containing Selenium. By M. J. Horn, E. M. Nelson and D. Breese Jones. Cereal Chemistry, 1936 (March), xiii, No. 1937, p. 126.

152. Amino Acid Content of Staple Foods. By Frank A. Csonka. Proc. Amer. Soc. Biol. Chemists, 1935, viii, No. 4, p. xxv (April). Abstract

153. The Relation of Selenium to a Toxicosis Produced by Ingestion of Wheat. By E. M. Nelson and D. B. Jones. J. Nutrition, 1935, ix, No. 6, and Supplement June 10th.

154. Amino Acid Content of Staple Foods. By Frank A. Csonka. Proc. Amer. Soc. Biol. Chemists, 1936, viii, No. 5, p. xxiii. Abstract

155. Studies on Digestibility of Proteins in Vitro. VII. Rate of Liberation of Cystine on Tryptic Digestion of Casein, with Observations on the Stability of Cystine in Digestion Mixtures at Different pH Values. By D. Breese Jones and Chas. E. F. Gersdorff. Proc. Amer. Soc. Biol. Chemists, 1936, viii, No. 5, p. liii. Abstract

156. Some Observations on Food Allergy. By Henry Stevens. Oil & Soap, 1936 (July), 13, No. 7, p. 162-165.

157. The Selenium and Cystine Content of Some Partial Hydrolysis Products of Gluten from Toxic Wheat. By D. Breese Jones, M. J. Horn, and Chas. E. F. Gersdorff. Cereal Chemistry, 1937 (Jan.), Vol. XIV, No. 1, p. 130-134.

158. Amino Acids in Staple Foods. I. Wheat (Triticum vulgare). By Frank A. Csonka. J. Biol. Chem., 1937 (March), Vol. 118, No. 1, p. 147-153.

159. Protein Content of the Bark of Black Locust, Robinia pseudacacia. By D. Breese Jones and Sammie Phillips. J. Amer. Chem. Soc., 1937 (March), Vol. 59, No. 3, p. 595.

160. Amino Acids in Staple Foods. II. The Effect of Milling Wheat on the Distribution of Amino Acids. By Frank A. Csonka. Cereal Chemistry, 1937 (May), Vol. XIV, No. 3, p. 397-399.

161. Wheat--Its Proteins and Nutritional Properties. By D. Breese Jones. Cereal Chemistry, 1937 (Nov.), Vol. XIV, No. 6, p. 771-782.

162. The Extent of Vitamin Deficiency in the United States. Report of Committee on Nutritional Problems, American Public Health Association. The Medical Woman's Journal, 1938 (Feb.), Vol. XLV, No. 2, p. 41-45; also American Public Health Association Yearbook, 1937-1938, p. 75-80.

163. Proteins of the Black Bean of the Mayas, Phaseolus vulgaris. By D. Breese Jones, Chas. E. F. Gersdorff, and Sammie Phillips. J. Biol. Chem., 1938 (Feb.), Vol. 122, No. 3, p. 745-755.

164. Changes that Occur in the Proteins of Soybean Meal as a Result of Storage. By D. B. Jones and Chas. E. F. Gersdorff. J. American Chemical Society, 1938 (March), Vol. 60, No. 3, p. 723-724.

165. Amino Acids in Staple Foods. The Role of Cystine in Proteolytic Digestion. By Frank A. Csonka. Proceedings of the Society for Experimental Biology and Medicine, 1938 (March), Vol. 38, No. 2, p. 281-283.

166. Soybeans--Their Food Value. By D. Breese Jones. MC-28. 1938 (April).

167. Decystinized Casein. By D. Breese Jones and Chas. E. F. Gersdorff. J. Biol. Chem., 1938 (May), Vol. 123, No. 3 (Scientific Proceedings XXXII), p. lxiv-lxv.

168. The Rate of Liberation of Amino Acids from Proteins on Enzymatic Hydrolysis. By D. Breese Jones and Chas. E. F. Gersdorff. XVI International Physiological Congress, August 14-19, 1938, Report II, p. 196-197, Zurich, Switzerland.

169. Amino Acids in Staple Foods. By Frank A. Csonka. XVI International Physiological Congress, August 14-19, 1938, Report II, p. 234-235, Zurich, Switzerland.
